FLow chart can help supervisor in real time.

👍 (3) ❤️ (1) 💬 0

We have a lot of IPV on our caseloads so very relevant

💬 0

Process maps can also help new staff learning the process.

💬 0

Helps home visitor and supervisor know what steps they need to take

💬 0

Yes animals, IPV, substance use, and even mental health are all current concerns that come up in our program

💬 0

Visuals are easier to follow

💬 0

When we aren't sure where to go it might provide some ideas on how to address the concern.

💬 0

Shared the map with directors to approve any changes to policies and procedures, and also shared it with new staff.

💬 0

To give a clear process for needs when in the field and a supervisor or program manager is not available.

💬 0

---

policies turned into a process map (visual) may be easier to sink in for some.

👍 (1) 💬 0

Ensures every staff member is following the same risk assessment and check in procedures

💬 0

---

a process to support when safety concerns in the community have been identified

0

What questions do you have about this resource on process maps?

Sonia Hernandez
Who should participate in the process map?

0

None at this time

0

How can we best use the process maps when a safety concern does not clear fit into one specific situation

0
